History (HIS)	**HIS 232**	**Survey of African History**	**3.00**	**Sophomore Year, 2nd Semester**

Description

This course is designed to introduce students to the social, political, economic, and cultural history of Africa from the earliest times to the nineteenth century. In this survey of African history, students will examine the historical background to more recent events on the continent. Students will gain an overview of some of the most significant developments in the African past, including early state building, the growing influence of Islam and Christianity, and the impact of the trans-Atlantic slave trade, as well as how these developments have shaped current debates over identity and economic underdevelopment. Pre-colonial Africa will be presented as a continent long at the crossroads of global interactions.

Nursing (NRS)	**NSG 241**	**Fundamentals of Nursing 1**	**4.00**	**Freshman Year, 1st Semester**

Description

The Fundamentals of Nursing I course is designed to introduce the student to the nursing profession through acquisition of knowledge of nursing history, code of ethics, values, scope of practice and the nursing process. The student learns beginning knowledge, skills and values to provide safe patient care. The content of this first course relates to concepts such as communication, vital signs, basic infection control (medical asepsis), activity and mobility, basic safety and comfort, hygiene, basic nutrition, elimination, general skin care and selected specimen collection. There is a laboratory component to this course where the student can learn and practice skills related to these concepts.

Nursing (NRS)	**NSG 243**	**Anatomy & Physiology 1**	**4.00**	**Freshman Year, 1st Semester**

Description

This course is the first part of the two-part course in Anatomy and Physiology. The student will be introduced to basic medical terminology. The content is organized according to the organ systems in the body. Part one will cover cellular functions, genetics and histology. The organs covered include integumentary, muscular, skeletal, nervous and sensory systems. To appreciate the importance of the content, the student will learn the immediate application to selected clinical pathology as they master anatomy and physiology. The course includes a laboratory component to enhance learning of the structure and function of the organs of the body. The learner will carry out direct observation on anatomical models, perform exercises and testing to enhance their learning.

Nursing (NRS)	**NSG 244**	**Pharmacology & Drug Calculations**	**4.00**	**Freshman Year, 2nd Semester**

Description

This course highlights the major drug classifications and the associated nursing care implications and patient teaching. The students will learn pharmacology by integrating knowledge of physiology, pathophysiology and the mechanism of drug action and how these translate to the nursing management of the patient on a specific drug therapy. Patient variables and their relevance to drug therapy such as health status, environmental, lifespan, gender, lifestyle, habits, and culture are discussed. They will learn the special considerations in the administration of drugs in pediatrics and geriatric patients. The students will apply knowledge of math to accurately calculate dosage and solutions using a variety of formula. The nursing responsibilities in the storage and administration of drugs will also be discussed.

Nursing (NRS)	**NSG 246**	**Fundamentals of Nursing 2**	**4.00**	**Freshman Year, 2nd Semester**

Description

The Fundamentals of Nursing 2 course is the continuation of the Fundamentals of Nursing I. It is designed to further the student knowledge of nursing practice. The student learns more complex knowledge, skills and values to provide safe patient care. The content for this second course includes concepts such as introduction to evidence-based care, documentation and reporting, infection control (surgical asepsis), orthopedic measures, special interventions for impaired skin integrity, pain assessment and interventions, medication administration, intravenous therapy, oxygen therapy and procedures, airway and emergency management, advanced urinary and bowel elimination procedures, care of the surgical patient, complicated wound management, palliative care and end-of-life care. The student will continue to use the nursing process in formulating care of the patient and family. There is a laboratory component to this course where the student can learn and practice skills related to these concepts. There is also a clinical component to this course which will expose the student to actual patient care. This will provide opportunities to increase their competencies in performing nursing care.

Description

This course is the second part of Anatomy and Physiology. The content is organized according to the organ systems in the body. Part two will cover organ systems that support body structure and mobility such as integumentary, skeletal and muscular. It also covers the systems responsible for integration and control of body functions such as the nervous, sensory and endocrine systems. The content also includes systems responsible for reproduction and development. To appreciate the importance of the content, the student will learn the immediate application to selected clinical pathology as they master anatomy and physiology. The course includes a laboratory component to enhance learning of the structure and function of the organs of the body. The learner will carry out direct observation on anatomical models, perform exercises and testing of concepts learned to enhance learning.

Nursing (NRS)	**NSG 250**	**Health Assessment**	**4.00**	**Freshman Year, 2nd Semester**

Description

This course teaches the student knowledge, skills and attitudes to perform a comprehensive health assessment through interviewing and physical examination of the patient. The student will learn how to conduct health assessment while taking into consideration the physical, psychological, social, cultural, spiritual, functional and environmental factors that affect health and illness. The student will learn how to report findings and document on the medical record. The student will be introduced to the basic principles of adult education as they apply to patient and family teaching. This course has a clinical laboratory component where the student practices interviewing, physical examination and patient/family teaching.

Nursing (NRS)	**NSG 444**	**Simplified Diagnosis & Treatment**	**4.00**	**Junior Year, 2nd Semester**

Description

This course is designed to expand students' skills in diagnosing and treating common diseases in Liberia. There are 84 hours of clinical component to the course. The students apply previous knowledge and skills of assessment such as obtaining vital signs, history taking and physical examination, interpretation of findings to arrive at a rapid and accurate diagnosis using an algorithm and flowcharts in the "Handbook for Health Personnel in Liberia. The student will also refer to diagnostic cards containing summary of algorithms of rapid diagnostic processes. The students will learn how to handle emergencies when working is low resource areas of Liberia. The students will integrate knowledge of community health, health education, nutrition, maternal-child care, prenatal care, family planning, environmental sanitation in running clinics and health centers. They will learn how to work with CHVs in delivering care to individuals, families and communities. The course teaches the student to function at the clinic level, linking the clinic with the community, and working with community-level providers.

Nursing (NRS)	**NSG 445**	**Pediatric Nursing 2**	**6.00**	**Junior Year, 1st Semester**

Description

This is the second part of a two-part clinical pediatric nursing course. This course is designed to teach students the acute and emergent nursing care of children, from infancy to adolescence. It builds on and assumes knowledge of newborn care, and care of healthy children learned in Pediatrics Nursing I. Application of growth and development, integration of pathophysiology, and teaching and counseling families are integral to this course. Emphasis is placed on the nursing process. Clinical practicum in acute care facilities and laboratory settings assists the student in integrating didactic content into providing safe and effective care to children and their families. This course will also focus on the World Health Organization's Integrated Management of Childhood Illnesses (IMNCI) as the primary strategy for managing illness in under-fives.

Nursing (NRS)	**NSG 453**	**Psychiatric Mental Health Nursing**	**8.00**	**Junior Year, 1st Semester**

Description

This 5 credit course will explore the mental health continuum model of care and how registered nurses assess where clients are along the continuum. The nursing process serves as the assessment mechanism to evaluate the client's biologic, psychological, and social domains. Mental health plans of care will focus on achieving the Sustainable Development Goal (SDG) targets of 3.4 to include mental health when planning client care for those with noncommunicable diseases. Also SDG target 3.5 specifically focuses on prevention and treatment of all substance abuse disorders. Identifying symptom onset, developing client-centered plans of recovery within an integrated, contextually specific, health care model is the goal upon completion of this course.

Subject	Short Name	Course	Credit Hours	Grade Level
Bible (BIB)	**BIB 434**	**ULIC Beliefs and Practices**	**1.00**	**Sophomore Year, 1st Semester**

Description

ULIC as a Christian denomination, institution, or people group, shares foundational elements that define its existence. The sum of these elements constitutes its worldview-that is, how it perceives itself, its environment, and the complex relational interactions between the two. This worldview explains how and why ULIC, as an organization, acts as it does, believes what it believes, and generally thinks and lives in the way it does. ULIC's culture, as a component of its worldview, reflects its core beliefs, value systems, principles, and practices. It clarifies how these aspects relate to the organization's or people's overall life, goals, and motivations. Therefore, to engage meaningfully with an organization or people group, we must understand their culture well. Only then can we function properly in our relationships with them. This cannot be underestimated.

Nursing (NRS)	**NSG 357**	**Medical-Surgical Nursing 1**	**6.00**	**Sophomore Year, 1st Semester**

Description

This course is the first part of the two-part course on medical and surgical nursing practices. It provides a theoretical foundation and evidence-based and/or best practices in the care of the patient with selected disease conditions. The focus will be on the biophysical and psychosocial concepts in nursing practice which covers homeostasis, stress and adaptation, and perioperative concepts. It will lay down the foundation for pain management, fluids and electrolytes disturbances, and the care of the older adult. Major organ dysfunctions covering integumentary, musculoskeletal, digestive and gastro-intestinal, kidney and urinary, hematologic, and reproductive systems will be discussed within the framework of the nursing process that includes patient education and psychosocial care. This course includes a clinical component to provide opportunity to apply knowledge learned in the classroom to clinical situations. The use of the nursing process will be emphasized in the care of patients with medical-surgical conditions.
